

FAA Runway Safety Data

Runway Incursion Data by Airport CY 1998 – CY 2001

Introduction

This document contains runway incursion data for all U.S. towered airports from CY 1998 to CY 2001 and includes the following for each airport:

- The yearly number and rate of runway incursions
- The yearly severity trends of runway incursions
- The number of surface incidents
- The CY 1998 – CY 2001 total number, average rate, and severity of runway incursions and the total number of surface incidents

To navigate within this document, please display the bookmarks in the left window.

These data are identical to Table 4 in the Appendix of the June 2002 FAA Runway Safety Report. However, the data in this document are divided into four appendices that contain the same information but are sorted differently in order to more easily find the airport of interest. The appendices are sorted as follows:

- **Appendix A: Sorted alphabetically by U.S. State**
Appendix A is sorted alphabetically by U.S. State. Within each State, the airports are sorted alphabetically by the airport name (e.g., Los Angeles International). To find the airport of interest, simply locate the State where the airport is located.
- **Appendix B: Sorted alphabetically by FAA Region**
Appendix B is sorted alphabetically by FAA Region. Within each of the nine FAA Regions, the airports are sorted alphabetically by the airport's three-letter code (e.g., AWP). To find the airport of interest, simply locate the FAA Region where the airport is located.
- **Appendix C: Sorted alphabetically by Airport Name**
Appendix C is sorted alphabetically by the airport's name (e.g., Los Angeles International).
- **Appendix D: Sorted alphabetically by Airport Code**
Appendix D is sorted alphabetically by the airport's three-letter code (e.g., LAX).

Note: The spelling of some airport names were taken from www.ar-group.com/icaoiaata.htm or Air Routing International

Appendix A
1998 - 2001 Runway Incursion Data by Airport
(Sorted alphabetically by State)

Annual number, rate, and severity of runway incursions (RI) and the annual number of surface incidents (SI) for U.S. towered airports from 1998 through 2001 are presented in the following table. Rates are given per 100,000 operations.

Definition of Table Headers:

State: Denotes the State where the airport of interest is located

Airport Name, City (Airport Code): Denotes the airport name, city location, and airport code

Region: Denotes the FAA geographical region where the airport is located

Type: Denotes either Runway Incursion (RI) or Surface Incident (SI) information

Data: Identifies the pertinent type of data for each airport

Totals: Shows the yearly sum of RI or SI data. For Rate information, however, the average rate of runway incursions at the airport from 1998 - 2001 rather than the sum of the yearly rates is shown.

Note: 'N/A' denotes that the rate is not available due to unreported number of operations at the airport for a specific year or all years

Appendix B
1998 - 2001 Runway Incursion Data by Airport
(Sorted alphabetically by Region)

Annual number, rate, and severity of runway incursions (RI) and the annual number of surface incidents (SI) for U.S. towered airports from 1998 through 2001 are presented in the following table. Rates are given per 100,000 operations.

Definition of Table Headers:

State : Denotes the State where the airport of interest is located

Airport Name, City (Airport Code) : Denotes the airport name, city location, and airport code

Region : Denotes the FAA geographical region where the airport is located

Type : Denotes either Runway Incursion (RI) or Surface Incident (SI) information

Data : Identifies the pertinent type of data for each airport

Totals : Shows the yearly sum of RI or SI data. For Rate information, however, the average rate of runway incursions at the airport from 1998 - 2001 rather than the sum of the yearly rates is shown.

Note : 'N/A' denotes that the rate is not available due to unreported number of operations at the airport for a specific year or all years

Appendix C
1998 - 2001 Runway Incursion Data by Airport
(Sorted alphabetically by Airport Name)

Annual number, rate, and severity of runway incursions (RI) and the annual number of surface incidents (SI) for U.S. towered airports from 1998 through 2001 are presented in the following table. Rates are given per 100,000 operations.

Definition of Table Headers:

State : Denotes the State where the airport of interest is located

Airport Name, City (Airport Code) : Denotes the airport name, city location, and airport code

Region : Denotes the FAA geographical region where the airport is located

Type : Denotes either Runway Incursion (RI) or Surface Incident (SI) information

Data : Identifies the pertinent type of data for each airport

Totals : Shows the yearly sum of RI or SI data. For Rate information, however, the average rate of runway incursions at the airport from 1998 - 2001 rather than the sum of the yearly rates is shown.

Note : 'N/A' denotes that the rate is not available due to unreported number of operations at the airport for a specific year or all years

Appendix D
1998 - 2001 Runway Incursion Data by Airport
(Sorted alphabetically by Airport Code)

Annual number, rate, and severity of runway incursions (RI) and the annual number of surface incidents (SI) for U.S. towered airports from 1998 through 2001 are presented in the following table. Rates are given per 100,000 operations.

Definition of Table Headers:

State : Denotes the State where the airport of interest is located

Airport Name, City (Airport Code) : Denotes the airport name, city location, and airport code

Region : Denotes the FAA geographical region where the airport is located

Type : Denotes either Runway Incursion (RI) or Surface Incident (SI) information

Data : Identifies the pertinent type of data for each airport

Totals : Shows the yearly sum of RI or SI data. For Rate information, however, the average rate of runway incursions at the airport from 1998 - 2001 rather than the sum of the yearly rates is shown.

Note : 'N/A' denotes that the rate is not available due to unreported number of operations at the airport for a specific year or all years
